MULTI-TASKING

WITH PRINT, SCAN,
COPY CAPABILITIES

Introducing the compact inkjet Multi-Function Centre (MFC) Series with wireless network capability.

Achieve professional performance with double-sided printing, Automatic Document Feeder, wireless connectivity and disc printing.

DCP-J925DW

The DCP-J925DW offers double-sided print, scan and copy capabilities in one stylish, compact machine.

Create a range of professional quality documents in-house including double-sided prints, high quality borderless images and printed discs. The machine offers impressive print speeds of up to 35ppm monochrome and 27ppm colour (12ppm monochrome and 10ppm colour - Laser comparable), so you are not kept waiting for your documents.

Connect and share the DCP-J925DW with multiple users across your existing wired or wireless network. The secure and user-friendly set-up enables you to connect straight from the box.

Print directly from your digital camera with the PictBridge port, or from your media card without the need to turn on your computer. With the new CD and DVD label printing feature, you can create labels quickly to organise your disc collection. The innovative Web Connect feature even allows you to connect to Picasa and Flickr from your MFC to download images and print directly. All these clever features are at your fingertips with the 3.3" Touchscreen LCD.

Reduce your printing costs with high-yield ink cartridges, and double-sided printing to lower your paper costs. All Brother inkjet Multi-Function Centres incorporate a four-individual ink system meaning that you only replace the ink which runs out, reducing waste and saving you money.

The DCP-J925DW complies with the strict Energy Star environmental standard, ensuring low energy consumption.
