# Extra Tough.

**Need more grunt?** The new Brother FS80X and FS60X sewing machines take heavy duty sewing seriously. From the metal frame interior to the powerful computerised motor, they are ready to sew the tough stuff. They're also easy to use, and come loaded with modern features - and who doesn't like that!

## EASY

Hold your phone's camera over the QR code to view helpful video tutorials to set up your Extra Tough sewing machine.

## SAFE

Protect fingers from the needle area while sewing with the Finger Guard attachment. (FS80X model only)

## STRONG

Stitch through layers and layers of denim without straining the Extra Tough's specially geared motor.

## HANDY

Raise the back of the foot up to level when stitching over multiple thicknesses with the Levelling Button.

FS80X shown

### Heavy Duty Metal Frame

The robust metal frame inside the Extra Tough sewing machines provides stability for steady sewing. Unlike a plastic frame, a metal frame is built to last for years.

### Powerful Motor

Power through heavy duty sewing projects with confidence, knowing your Extra Tough sewing machine is built to keep up.

### Speed Controller

Say goodbye to stitches running away from you. Set your preferred maximum sewing speed and watch your sewing control and success soar.

### Needle Threader

Save time and eye strain with the easy-to-use needle threader. Need help? The video will have you threading in no time.

### Suitable for Stretch Fabrics

T-shirt fabric, Lycra and jersey need strong seams that can flex. The stretch stitches built into Extra Tough sewing machines are designed to last for the life of your garment.

### Suitable for Denim

The powerful computerised motor is just one of the many features that make Extra Tough machines ideal for denim, upholstery, costumes, curtains and pleather.

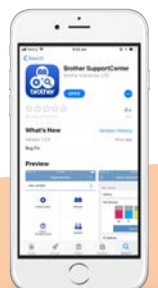

### What's included?

Both models come with 7 handy presser feet

- Spring Action Zigzag Foot - a general allpurpose presser foot for a straight or zigzag stitch
- Zipper Foot - to sew zippers into projects
- Buttonhole Foot - to stitch buttonholes in one easy step
- Button Sewing Foot - to hold the button in place while you sew it on
- Overcasting Foot - use with overcasting stitches to finish fabric edges
- Monogramming Foot - for decorative stitches
- Blind Stitch Foot - to create practically invisible blind hems
- The FS80X also includes a Non Stick Foot for sewing pleather and similar fabrics that grab with a regular foot

### Online Support at your fingertips

- How to videos
- Operation Manual
- Stitch pattern chart
- Needle and thread suggestions for different fabric types
