

Effortless Integration

The TD-4 Series Professional
4-Inch Desktop Barcode
Label and Receipt Printers

Brother's range of TD-4 professional printers offer the ability to print high-quality barcodes, labels and receipts on demand, whatever the requirement. Printing media up to 4 inches in width, and with direct thermal and thermal transfer print technology, they fit the requirements of a large range of vertical market applications.

Effortless integration

Experience improved operational efficiency with seamless integration into existing and future workflows utilising Bpac, Software Development Kits (SDKs), PDF Crop tool, BarTender and the support of a variety of printer command systems, including ZPLII, EPL/DPL emulation

Reliable technology

Thermal technology is made up of less moving parts delivering greater reliability for your business

A full thermal print solution

Design and print from start to finish with Brother's free P-touch Editor label design software. With hundreds of templates and barcode creation, label development for any vertical can be achieved

Warranty

Delivering peace of mind with a 2 year return to base warranty on hardware and a 6 month return to base warranty on print heads. Rapid exchange is also available as an optional add-on

Versatile connectivity options

There's a connectivity option for every solution with USB, Wireless, Network, Bluetooth, AirPrint and dual wireless radio band available across different models

Professional Label Printing

Labels are often required to display a considerable amount of important information, so you need a printer that can put it all together efficiently, with consistent, high-quality results.

The TD-4 Series of desktop label printers offers direct thermal and thermal transfer high-speed printing, at up to 300 dpi resolution. Options include a peeler or automatic cutter, for producing continuous media to your required length on demand.

The software supports barcode printing, embellish font programming for highlighting specific words, and also allows you to import graphics and date formats for a truly personalised solution.

Printing Technology

Thermal Transfer

Crisp, durable printing is achieved through a process in which the image is imprinted onto the label or paper via a coated ribbon, making it ideal for applications that require robust, harder-wearing labels.

Direct Thermal

Low-cost, high-volume labels can be created through this process, which uses a heat-sensitive coating and thermal print head, meaning traditional printing ribbons and ink are not required. Ideal for shorter term and less permanent labelling uses.

Healthcare, Medical and Laboratory

With the strict regulations on the tracking of patient specimens and other items within the healthcare industry, clear, high-quality labelling is essential to maintain safety and traceability.

Applications ideal for:

- Appointment cards
- Admission labels
- Specimen and pathology labels
- Laboratory labels
- Microbiology labels
- Dosage/drug bag labels

Warehousing and Logistics

Efficient warehousing operation and worker productivity are critical to the success of many companies. With the most common sizes of shipping labels available and the ability to create custom size labels there are many uses for these models in the warehouse.

Applications ideal for:

- Shipping labels
- Carton labels
- Location labels
- Pallet identification labels
- Quality control labels
- Compliance labels

Retail

Easy-to-read labels are essential for consumers to help make informed decisions before making a purchase. The high print resolution and high-quality labels used in this range ensure that every output printed looks professional, offering sharp text, logos and barcodes with a high contrast to ensure faultless scanning at the checkout.

Applications ideal for:

- Pricing labels
- Barcode labels
- Pre-packaged food ingredients labels
- Nutrition information labels
- Shelf-edge labels
- Sale/mark-down/discount pricing labels

With label design apps for desktop PCs and mobile devices, and SDKs to integrate the TD-4 range into your applications, you can choose the best option for your label printing needs.

Brother provides all the necessary tools required for software developers to integrate printing into their applications. Printer drivers are available for Windows OS, and Software Development Kits can be provided to support Windows Mobile, Android and iOS operating systems.

Software Support Features

P-touch Editor

Supplied as standard, you can create your own custom labels with pixel precision by using this powerful software solution. With features such as support for over 15 barcode protocols, advanced image dithering to print high-quality grayscale images, and the ability to link to data contained in most databases for batch printing of labels, any label design is possible.

Direct Thermal models only

Printer Commands

With support for ZPLII, EPL/DPL emulation and a variety of additional printer command languages, developers can easily integrate printing into existing legacy systems (see specification tables for further details).

Crop Function

Built into the Windows driver, this function helps take away the inconvenience of using A4 sheets of labels in your standard printer. This clever feature automatically scans through the document and where a barcode is present it extracts shipping or product labels one at-a-time and then prints as individual labels on the Brother label printer

Direct Thermal models only

Mobile Deploy

Cloud-based app for mobile devices (iOS and Android™), which allows IT administrators to remotely update and configure multiple Brother mobile printers. Using Mobile Deploy, the administrator can easily upload new update packages to an online location, and then share the URLs with the users.

Direct Thermal models only

Template Mode

Design the required document on your Windows PC, including logos and barcodes. Once transferred and stored in the printer's memory, the template can be recalled and any data replaced, before printing with just a few short commands.

Direct Thermal models only

BarTender

Brother's TD-4 devices come with various versions of BarTender* - BarTender is the world's most trusted software for designing, printing and automating the production of labels, barcodes, RFID tags, plastic cards and more.

*Direct Thermal models: BarTender Lite
Thermal Transfer models: BarTender Ultra Lite

BTP (Barcode Template Print) Function

Transfer templates and database fields to your TD-4 printer so you can do database-assisted label printing. With a barcode reader connected to the printer, labels and barcodes can easily be printed by scanning barcodes.

Direct Thermal models only

Software Development Kits (SDKs)

Brother can also supply a selection of free of charge Software Development Kits to give you an easy method of incorporating label printing directly from within your own software programs.
