

QL-800 Series

The QL-800 series professional label printers offer unrivalled versatility not only in the office, but also retail, food, postal, facilities management and other industries. Create labels with black and red* print up to one metre in length, from PC, Mac, iOS** or Android** devices. Several wired and wireless connectivity options are available, and even the ability to directly print labels stored in

the printer's memory using the integrated LCD/control panel on the QL-820NWB, or external devices connected to the printer. For developers and systems integrators looking to incorporate label printing as part of their solutions, software development kits for Windows, iOS and Android offer an easy way to add support for the Brother QL-800 series label printers.

Versatile Labelling Options

Boasting the highest print speeds and the most connectivity options in their class, the QL-800 series label printers are the ideal solution for many types of business.

Key Features:

Print in black and red to highlight important information

Wide range of connectivity options.

PC, Mac, iOS and Android compatibility

High speed printing of up to 110 labels per minute

Use continuous rolls and cutter to print labels up to one metre in length

Stand-alone printing function where no PC required – ideal for food and retail applications

Packed with features

Software Solutions

P-touch Editor Lite* / P-touch Editor Lite LAN*

Built inside the QL-800 and QL-810W, this easy to use label design software works without the need to install software or drivers. Working like a USB flash drive, simply connect to your PC/Mac using USB, and launch the software from the drive that appears. Include images, frames and any of your fonts on your label design and print! A version for network connected models is also available - simply run the software to allow many PC's in an office to print labels to the one printer. Again, no installation needed.

brother at your side QL-800 & QL-810W

P-touch Editor with Microsoft Office add-in

Design professional labels including images and logos, barcodes and frames. Link to data contained in Excel or .csv files, to print many labels quickly and efficiently. The Microsoft Office add-in lets you highlight, click and print right from within Word, Excel or Outlook.

Brother iPrint & Label app** for iOS and Android smartphones/tablets

Print labels on the QL-810W and QL-820NWB using the free iPrint&Label app. Connect via Wi-Fi or Bluetooth (on QL-820NWB), and choose one of the pre-defined templates or quickly design your label from scratch. This free app is available from your mobile device's app store by searching "Brother iPrint&Label"

Software Development Kits for Windows, iOS and Android

System integrators and software developers can now take advantage of various Brother SDK's that allow easy integration of label printing directly within their own apps and software. For more information please visit: http://www.brother.eu/developer

- * Black print capability only. Use P-touch Editor for black and red printing
- ** Red print capability from iPrint&Label app available summer 2017

Advanced Functionality

Stand-alone label printing

The QL-820NWB has a large memory to store label templates designed in P-touch Editor. Label templates can be uploaded to the printer's memory, and accessed using the integrated control panel and backlit graphic LCD display. Ideal for printing current or future date/time on labels in the food and retail industries.

Remote template update via FTP

Where the QL-820NWB is deployed at multiple locations, updating the templates in all printers would normally be a time intensive operation. However the printer can automatically connect using FTP to a remote server, and if new templates are found, update these automatically. This helps companies save time and money, and ensures consistent operation at all remote sites. All this directly from the printer via the internet, without needing a PC connection.

AirPrint* and Bluetooth with MFi (Made for iPod/iPhone/iPad) compatibility

The QL-810W and QL-820NWB both support Apple AirPrint* to enable printing from compatible apps on iOS devices and Mac. Additionally, the QL-820NWB offers Bluetooth connectivity to easily connect iOS and Android devices to the printer.

* iOS and macOS only supports black print when using the default AirPrint function, however red print capability is available from iOS devices when using AirPrint with apps developed using the Brother Software Development Kit.

For the Office

There are so many uses for labels around the office. In addition to address labels for envelopes and parcels, identify the contents of files and storage boxes. Label shelves so items are returned to the correct place. The black/red* printing capability enables essential information to be highly visible, such as valid-on dates on visitor badges. The continuous film rolls are also ideal for indoor signage, helping facilities managers create bespoke signs on demand.

For Warehousing and Logistics

In busy warehouses and post rooms, accurate and timely labelling of parcels, envelopes and product cartons is essential to ensure the smooth running of all logistics operations. Using red* print on handling labels ensures this crucial information is noticed, while barcodes can be quickly generated as-and-when required.

* Requires DK-22251 roll

For Retail and Hospitality

Conveying product pricing and any special offers to shoppers quickly is crucial for the retail sector. Print pricing labels for product tags, that can also include barcodes. And use red* print on to highlight special offers or promotions by creating eye-catching indoor signage.

On-demand label printing is a critical part of the food industry, such as highlighting allergen information to consumers, show use-by/best before dates, and product pricing including EAN-8 / EAN-13 barcodes. The QL-820NWB with its stand-along label printing function is ideal for counter-top use, and printing labels on-demand. Takeaway outlets can print details of orders, including address information where delivery is required.

^{*} Requires DK-22251 roll

^{*} Requires DK-22251 roll

Summary of Features

	QL-800	QL-810W	QL-820NWB
Fast print speed - number of labels per minute	93	110	110
Print labels with both black and red* print	•	•	•
Advanced label design software for PC/Mac (P-touch Editor)	•	•	•
Built-in label design software for PC/Mac that requires no software or driver installation (P-touch Editor Lite)	•	•	
USB	•	•	•
Wi-Fi with AirPrint		•	•
Wired Ethernet			•
Bluetooth for easy connection to iOS/Android devices			•
Stand-alone printing of labels stored in printer memory			•
Optional li-ion battery for printing away from power sources		•	•
Software Development Kits available for Microsoft Windows***, iOS and Android devices to add label printing to your own solutions	•	•	•

DK Rolls for the QL-800 label printer series

Wide range of labels available in paper and plastic film material, pre-sized labels or continuous rolls.

DK Die-Cut Labels	Material	Colour	Size	Item No.
Standard address label (400/roll)	Paper	White	29 x 90 mm	DK-11201
Large address label (400/roll)	Paper	White	38 x 90 mm	DK-11208
Small address label (800 roll)	Paper	White	29 x 62 mm	DK-11209
Shipping label (300/roll)	Paper	White	62 x 100 mm	DK-11202
File folder label (300/roll)	Paper	White	17 x 87 mm	DK-11203
Multi-purpose label (400/roll)	Paper	White	17 x 54 mm	DK-11204
