Brother TZE laminated labels – designed to last

Brother P-touch laminated TZe tapes consist of six layers of materials, resulting in a thin, extremely strong label. The characters are then formed within a thermal transfer ink and sandwiched between two protective layers of PET (polyester film). The result is a virtually indestructible label that can withstand even the harshest conditions. As the labels have been tested to the extreme, you can be confident of a professional quality label that has been designed to last.
