Tip When cutting dark-colored material using Direct Cut, using a white or other light-colored pen to draw the cutting lines on the back of the material helps ensure better recognition.

Function: Direct Cut

1 Create the side pieces that go around the can. First, use a tape measure to measure the can's circumference, and if the length is greater than 12 inches, cut as multiple pieces.

2 The circumference of the can used in this recipe is 13.5 inches, which is greater than 12 inches, so cut the side piece in two parts, each measuring half the length (6.75 inches).

3 Hand-draw band lines for the side pieces on the back of the material and cut using Direct Cut.

4 Glue the cut bands to the side of the can.

5 Cut the built-in pattern pieces, and glue first ribbon and then the cut pieces to the can in layers.

6 Decorate by attaching lace, rhinestones, and other items. Positioning lace and ribbon over edges and seams can help produce a more-attractive appearance.
